# RESULTS YOU NEED — SAVINGS YOU WANT

Enabling your workforce with the right tools empowers them to accomplish more, and the radios they use, complemented by a range of advanced accessories, can make all the difference. Simply put, Motorola two-way radios are the answer to everything from clearer communication and easier usage, to the uninterrupted performance they need on the job. Find ergonomic design, crisp audio quality and long-lasting battery life in all of Motorola's business models.

**CLP SERIES RADIOS:** The CLP's small, unobtrusive design packs a big punch in a lightweight, palm-sized package and offers the most reliable communications in even the noisiest of environments. With a coverage range of 100,000 square feet/10 floors (across 1, 4 or 6 channels), each radio in the entire series is easily operable and comes standard with push-to-talk functionality and an extended battery life. The CLP is also narrowband ready, Bluetooth compatible, and meets all military specifications.

**CLS SERIES RADIOS:** Rely on impressive coverage capability in this compact radio. The CLS series operates on 56 business-exclusive frequencies and includes a coverage range of up to 200,000 square feet, or the equivalent of 15 floors, with the choice of either single- or four-channel modes. Intuitive and user friendly, the CLS' streamlined design is fronted by a crystal-clear LCD display.

**DTR SERIES RADIOS:** Give team members several options for public group calling, through a digital one-to-many feature on the DTR that can accommodate up to 25 groups, from 50 public IDs. A private-reply/caller ID feature allows the choice of sending recipients audible or vibrating alerts for discreet communications when needed. The DTR meets all military standards for shock, vibration, water, dust and temperature, and can cover 30 floors/350,000 square feet (DTR 550 model) — a wise choice for busy working conditions.

**RM SERIES RADIOS:** Charging your workforce with a reliable, long-lasting audio solution is the hallmark of the RM Series. Capable of customizing channels per radio via voice alias, the RM has a coverage range of up to 250,000 square feet (20 floors) and can operate on either 4 or 8 channels, across each UHF, VHF and MURS frequency. Count on a long, 15-hour battery life with the RM Series, radios that meet all MilSpec standards.

\* Coverage may vary based on terrain and conditions

**ACCESSORIES:** Behind every radio is a partner to back it up. Combining any business radio with the high performance and discreet design of Motorola's accessory earpieces gives complete hands-free communication when your radio can't be accessed, with a responsive push-to-talk feature and ergonomic construction.
