

VX-410/-420 Series Operating Manual

Controls & Connectors

LED Indicator

Glow Green	Monitor on (or Side 1, 2 switch is activated : VX-410 series only)
Blinking Green	Busy Channel (or SQL off)
Glow Red	Transmitting
Blinking Red	Battery Voltage is low
Yellow	Receiving a Selective Call

SAFETY TRAINING INFORMATION

This Radio has been tested and complies with the Federal Communications Commission (FCC) RF exposure limits for Occupational Use/Controlled exposure environment. In addition, it complies with the following Standards and Guidelines:

- FCC 96-326, Guidelines for Evaluating the Environmental Effects of Radio-Frequency Radiation.
- FCC OET Bulletin 65 Edition 97-01 (1997) Supplement C, Evaluating Compliance with FCC Guidelines for Human Exposure to Radio Frequency Electromagnetic Fields.
- ANSI/IEEE C95.1-1992, IEEE Standard for Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 3kHz to 300 GHz.
- ANSI/IEEE C95.3-1992, IEEE Recommended Practice for the Measurement of Potentially Hazardous Electromagnetic Fields-RF and Microwave.

WARNING: This radio generates RF electromagnetic energy during transmit mode. This radio is designed for and classified as **Occupational Use Only**, meaning it must be used only during the course of employment by individuals aware of the hazards, and the ways to minimize such hazards. This radio is not intended for use by the **General Population** in an uncontrolled environment.

CAUTION: To ensure that your expose to RF electromagnetic energy is within the FCC allowable limits for occupational use, always adhere to the following guidelines:

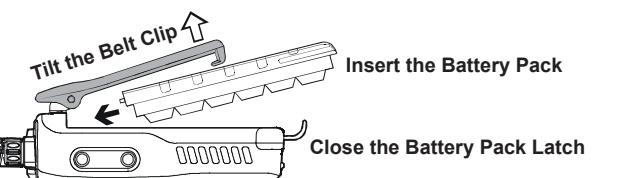

- This radio is NOT approved for use by the general population in an uncontrolled environment. This radio is restricted to occupational use, work related operations only where the radio operator must have the knowledge to control its RF exposure conditions.

- When transmitting, hold the radio in a vertical position with its microphone 1 to 2 inches (2.5 to 5 cm) away from your mouth and keep the antenna at least 1 inch (2.5cm) away from your head and body.

Before You Begin

Battery Pack Installation and Removal

- To install the battery, hold the transceiver with your left hand, so your palm is over the speaker and your thumb is on the top of the belt clip. Insert the battery pack into the battery compartment on the back of the radio while tilting the Belt Clip outward, then close the Battery Pack Latch until it locks in place with a "Click."

- To remove the battery, turn the radio off and remove any protective cases. Open the Battery Pack latch on the bottom of the radio, then slide the battery downward and out from the radio while holding the Belt Clip.

Caution!
Do not attempt to open any of the rechargeable Battery packs, as they could explode if accidentally short-circuited.

Low Battery Indication

- As the battery discharges during use, the voltage gradually becomes lower. When the battery voltage becomes to low, substitute a freshly charged battery and recharge the depleted pack. The **TX/BUSY** indicator on the top of the radio will blink **red** when the battery voltage is low.
- Avoid recharging batteries often with little use between charges, as this can degrade the charge capacity. We recommend that you carry an extra, fully-charged pack with you so the operational battery may be used until depletion (this "deep cycling" technique promotes better long-term battery capacity).

Operation

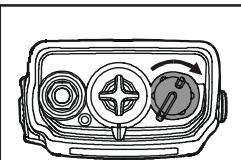

Preliminary Steps

- Install a charged battery pack onto the transceiver, as described previously.
- Screw the supplied antenna onto the Antenna jack. Never attempt to operate this transceiver without an antenna connected.
- If you have a Speaker/Microphone, we recommend that it not be connected until you are familiar with the basic operation of the **VX-410/-420**.

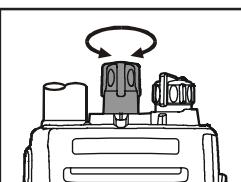

Operation Quick Start

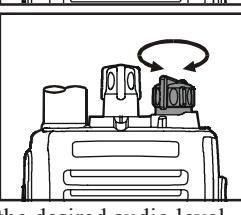

- Turn the top panel's **VOL/PWR** knob clockwise to turn on the radio on.

- Turn the top panel's **CH** selector knob to choose the desired operating channel.

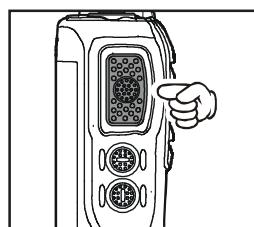

- Rotate the **VOL/PWR** knob to set the volume level. If no signal is present, press and hold in the **Programmable** key assigned to "MONITOR" for more than 1 second; background noise will now be heard, and you may use this to set the **VOL/PWR** knob for the desired audio level.

- Press and hold in the **Programmable** key assigned to "MONITOR" for more than 1 seconds (or press the **MONITOR** key twice) to quiet the noise and resume normal (quiet) monitoring.

- To transmit, monitor the channel and make sure it is clear. **THIS IS AN FCC REQUIREMENT!**

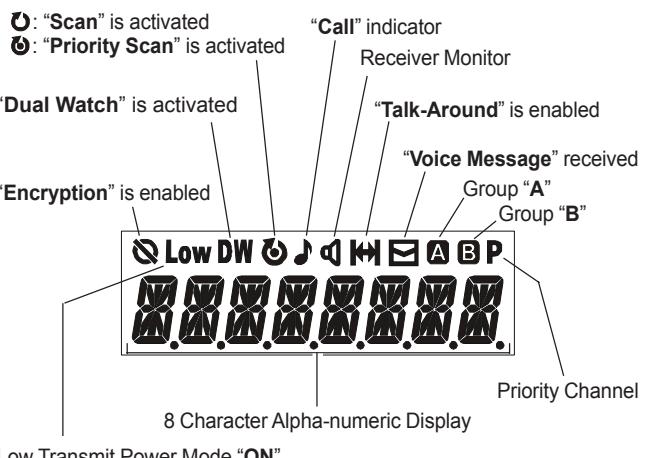

- To transmit, press and hold in the **PTT** switch. Speak into the microphone area of the front panel grille (lower left-hand corner) in a normal voice level. To return to the Receive mode, release the **PTT** switch.

- If a Speaker/Microphone is available, remove the plastic cap and its two mounting screws from the right side of the transceiver, then insert the plug from the Speaker/Microphone into the **MIC/SP** jack; secure the plug using the screws supplied with the Speaker/Microphone. Hold the speaker grille up next to your ear while receiving. To transmit, press the **PTT** switch on the Speaker/Microphone, just as you would on the main transceiver's body.

Note: Save the original plastic cap and its mounting screws. They should be re-installed when not using the Speaker/Microphone.

Display Icons & Indicators (VX-420 Only)

This device complies with Part 15 of the FCC rules. Operation is subject to the condition that this device does not cause harmful interference.

Notice !

There are no owner-serviceable parts inside the transceiver. All service jobs must be referred to an authorized VERTEX STANDARD Service Representative. Consult your Authorized VERTEX STANDARD Dealer for installation of optional accessories.

Accessories & Options

FNB-83	7.2 V 1400 mAh Ni-MH Battery
FNB-V94	7.2 V 1800 mAh Ni-MH Battery
FNB-V67LI	7.4 V 2000 mAh Lithium-Ion Battery
FBA-25A	Alkaline Battery Case
VAC-10	Desktop Charger (for FNB-83/FNB-V94)
VAC-810	Desktop Rapid Charger (for FNB-V67LI)
VAC-6010	6-unit Multi Charger (for FNB-83/FNB-V94)
VAC-6810	6-unit Multi Charger (for FNB-V67LI)
MH-45B4B	Speaker/Microphone
MH-360S	Speaker/Microphone (Miniature Type)
MH-450S	Speaker/Microphone (Small Type)
MH-37A4B	Earpiece Microphone
VH-110S	Over the Head, Heavy Duty Headset
VH-115S	Lightweight headset w/Boom
VH-120S	3-Wire Earpiece, Mic, Palm PTT Switch
VH-130S	2-Wire Earpiece, Mic, Palm PTT Combo
VH-215S	Over-the-head Single Muff Headset
VC-25	VOX Headset
VCM-1	Mobile Mounting Bracket (for VAC-810)
DCM-1	Desktop Charger Bracket (for VAC-10)
VCM-3	Mobile Mounting Bracket (for VAC-10)
FVP-25	Encryption/DTMF pager Unit
FVP-35	Encryption Unit (Rolling code voice scrambler)
DVS-5	Voice Storage Unit
VME-100	MDC1200®/GE-STAR® ANI Encoder Unit
VMDE-200	MDC1200®/GE-STAR® ANI Encoder/Decoder Unit
ATU-6A	Rubber Antenna 400-430 MHz
ATU-6D	Rubber Antenna 450-490 MHz
ATV-6XL	Rubber Antenna 134-174 MHz (Untuned)
ATV-8A	Rubber Antenna 134-151 MHz
ATV-8B	Rubber Antenna 150-163 MHz
ATV-8C	Rubber Antenna 161-174 MHz
