Operation:

Turn the radio on and operate it as explained in the operating instructions supplied with the radio. Installing the 2 wire earbud bypasses the radio's speaker and routes the output to the earset's speaker. When applicable, the in-line push-to-talk (PTT) switch disables the radio's microphone and enables the external microphone.

The 2 wire earbud accessory has concealable features and two cords - one for the earbud, and the other for the microphone. The cord for the microphone is long enough to slip underneath the sleeve of a shirt, jacket, or other clothing covering. The microphone operates with a side-mounted PTT switch and is small enough to fit into the palm and can be concealed by closing the hand. The microphone also has a clip to secure it to a collar of a shirt, jacket, etc.
