MOTOROLA TALKABOUT® SX700 TWO-WAY RADIO SERIES

The Motorola Talkabout® SX700 is the ultimate communication tool for the serious outdoor enthusiast. With a range of up to 12 miles* and loaded with every possible radio feature, you know that with the SX700 you are ready for the extreme outdoors.

Lightweight and rugged, with side grips to help you hold on, and a holster to provide you with quick access, the SX700 is built to handle any challenge without weighing you down.

NOAA WEATHER CHANNEL

Want to know where the best conditions are for your rock climbing outing? Tune into a NOAA channel (National Oceanic and Atmospheric Administration) on your SX700 for continuous local and regional weather broadcasting. And when you are out having fun, weather alerts will provide you with warnings of incoming weather to protect from the dangers of a sudden storm.

FULL-FEATURED PRIVACY

To prevent cluttered channels, the SX700 has a full 22-channel capacity each with 121 privacy codes, creating 2,662 combinations. Additionally, Priority scan quickly finds the most private channel in crowded environments, and with the QT™ (Quiet Talk) interruption filter enabled, radios from other manufacturers can't be heard on your channel ensuring a private conversation for your group.

HANDS-FREE COMMUNICATION

In the middle of a mountain bike trail you really don't want to take your hands off the handlebars. Enter iVOX. Acting as a speakerphone, the iVOX hands free communication allows you to use your hands for other activities while keeping in touch.

SILENT SIGNALS

The VibraCall® silent vibrating ringer is especially useful for locations where ringing can be intrusive. This feature is also great when noise from a sporting event would drown out your ring tone.

COMPANDING

The SX700 has a Motorola exclusive feature —“companding”— a sophisticated digital technology that filters out static between words. This allows the radio to deliver noticeably clearer transmission.

PRICING

Manufacturer's Suggested Retail Price is \$79.99 (NiMH) per pair.

***How far can I expect my radios to communicate?** The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference, and obstructions. Please visit www.giantintl.com/range for further information.
