## MOTOROLA TALKABOUT® MD207 TWO-WAY RADIO SERIES

The Motorola Talkabout® MD207 series has a range of up to 20 miles\* for indoor and outdoor communication. It is the perfect product for the value-conscious shopper, providing all the important features at a low cost. It includes 22 channels with 121 interference eliminator codes and 7 NOAA channels with alerts to always be informed about weather and other emergencies.

### \*\*\*NOAA WEATHER CHANNEL

Want to know where the best conditions are for your rock climbing outing? Tune into one of 7 NOAA channels (National Oceanic and Atmospheric Administration) on your MD207 for continuous local and regional weather broadcasting. And when you are out having fun, weather alerts will provide you with warnings of incoming weather to protect you from the danger of a sudden storm.

### FUNCTIONAL NEW DESIGN

The Talkabout® MD207 is designed for great looks, as well as solid, functional operations. The location and size of the big buttons make operating this radio a breeze, even when wearing gloves. The sleek rugged housing protects the radio whether it's being used on the playground, in the neighborhood, at the campground, or at the mall.

### ACCESSORIES

The MD207 series features an accessory connector permitting use of an audio accessory headset for easy hands-free operation.

### DUAL POWER

Are you running out of battery power and with no power outlet around to recharge the batteries? Just pop in 3 AA batteries and your unit is operating again.

### CALL TONES

Call tones are what people calling you can hear instead of the normal default ring. Choose what your callers will hear from 10 audible call tones to grab the attention of your family and friends before you start speaking.

### ECO SMART

The collective energy wasted in powering handheld electronics has become a global issue. Most of the energy wasted while charging a mobile device occurs within the charge. On an individual basis, the amount of energy wasted per year is negligible. However, there are hundreds of millions of chargers in use today. The large-scale incorporation of energy efficient chargers benefits the planet both economically and environmentally. The MD series does its part by using the latest technological design to produce a high efficiency wall adapter which consumes one half watt of power during idle conditions.

### SCAN

Use the scanning feature to see which channels are currently in use.

### LOW BATTERY ALERT

Low battery alert reminds you when batteries are running low.

### KEYPAD LOCK

Keypad lock prevents your personalized settings from being inadvertently changed.

### PRICING

MSRP for MD207R is \$54.99 per pair. (NiMH)

FOR ADDITIONAL MEDIA INFORMATION, CONTACT: COLLEEN PHILBRICK, 912-604-1950 OR PHILBRICKPR@BELLSOUTH.NET. FOR DEALER OR CONSUMER INQUIRIES, PLEASE CALL 1-800-638-5119.

\*How far can I expect my radios to communicate? The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference and obstructions.

\*\*IP-51: Dust protection and protection from dripping water (vertically falling drops).

\*\*\*NOAA radio service may not be available in all areas. Check with your local weather office for frequency and details, or visit [www.weather.gov/nwr](http://www.weather.gov/nwr).
