- NOAA weather radio-capable
- Weather alerts
- QT™ (QuietTalk) noise filter

## Five-Mile Range in the Color You Want

### Motorola Talkabout® T6500 Two-Way Radio Series

One of the rugged “Sports Series” of up to 5-mile range,\* two-way radio models designed specifically for serious outdoor enthusiasts and active families. Combining General Mobile Radio Service (GMRS) technology with Motorola engineering, this radio is ideal for active outdoor communications.

### Durable Design

The Talkabout® T6500 has rugged rubber grips to protect the radio, so it’s suitable for any activity. It also comes in an eye-catching yellow color designed to make a statement.

### NOAA Weather Channel\*\*

For the latest weather conditions, tune into the NOAA channel (National Oceanic and Atmospheric Administration) which provides continuous weather broadcasting.

### Full-Featured Privacy

The Talkabout® T6500 has full 22-frequency capacity, and unlike our competitors, it has 99 Motorola exclusive codes, so there are more channel combinations than ever. “Priority Scan” helps you quickly find the most private channel in crowded environments to give you a chatter-free channel. And when you enable the Talkabout’s exclusive QT noise filter, radios from other manufacturers can’t be heard on your channel.

### Silent Signals

The VibraCall® silent vibrating ringer is especially useful for sportsmen—and for those locations where ringing can be intrusive. This feature is also great when the roar of the crowd drowns out your ring tone.

### Companding

The Talkabout® T6500 has a special feature—“companding”—a sophisticated digital technology that filters out the static hiss between words. This not only extends the effective range of the radio but also delivers a noticeably clearer transmission quality.

### Accessories for Easy Operations

This model has an accessory connector for headset operation, as well as a no-accessory hands-free capability—so you can use your radio speakerphone-style.

### Power to Spare

These radios are sold in pairs—just charge up the rechargeable NiCd power units or drop in three AA batteries and you’re ready to start communicating.

### Pricing

Manufacturer’s Suggested Retail Price is \$69.99 (AA) or \$79.99 (NiCd) per pair.
